Description size S

The new InRun valve actuators are a revolution for safety, control valve and other motorized applications for HVAC systems, in chemical, pharmaceutical, industrial and Offshore-/Onshore plants, for use in safe areas. IP66 protection, small dimensions, only 7 kg weight, universal functions and technical data, an integrated heater guarantee safe operation even under difficult environmental conditions. High quality brushless motors guarantee long life.

All actuators are programmable and adjustable on site. Special tools or equipment are not required. 5 motor running times and 2 forces as - according to the actuator type - are selectable or adjustable on site. The integrated universal power supply is self adaptable to input voltages in the range of 24 to 240 VAC / DC.

The actuators are 100% overload protected and self locking.

The modular concept offers the possibility to mount adjustable end switches for signalization (except version InRun -...- X).

InRun -...- P actuators are additionally equipped with a feedback potentiometer.

InRun -...- U is a 3 Pos. actuator but additionally equipped with an analogue output 0..10 V / 4..20 mA.

The InRun -...- S has integrated aux. switches (fix positions).

Highlights

- ▶ Industrial actuators
- ▶ Universal supply unit from 24 to 240 VAC/DC
- ▶ Selectable forces (0,5 - 1,0 kN) (2,5 - 5 kN) (7,5 - 10 kN), acc. to type
- ▶ Selectable motor running times (2-3-6-9-12 s/mm) resp. (4-6-9-12-15 s/mm) acc. to type
- ▶ On-Off, 3-Pos, 3-Pos-P with potentiometer, 3-Pos-U with 0..10 V / 4..20 mA feedback
- ▶ 0,5 - 1,0 - 2,5 - 5,0 - 7,5 - 10 kN actuator in only one housing (size S)
- ▶ 100 % overload protected, self locking
- ▶ Mechanical stroke limitation, 5..60 mm adjustable
- ▶ Adjustable feedback gear unit for strokes 10 / 20 / 30 / 60 mm
- ▶ integrated junction box
- ▶ Compact design and small dimension (L x W x H = 298 x 208 x 115 mm)
- ▶ Robust aluminium housing (optional marine painting „Amercoat“)
- ▶ IP66 protection
- ▶ Manual override included
- ▶ Only 7 kg weight
- ▶ Integral safety temperature sensor
- ▶ Status indication by LED

Electrical connection

All actuators are equipped with an universal supply unit working at a voltage from 24 to 240 VAC/DC. The supply unit is self adjustable to the connected voltage!
Device must be fuse protected max. 5 AT. Note current consumption acc. to running time and applied voltage. Do not open the junction box when circuit alive.

Parameter, Adjustment – Failure indication

Switch – Push button – Lamp for adjustment, behind the blanking plug

- 10-position switch (S)
- Push button (T)
- 3-colour LED

Parameter selection

Example:
InRun-25.50

Type	Forces		Forces	
..Run -5.10	500 N	1.000 N		
..Run-25.50	2.500 N	5.000 N		
..Run-75.100			7.500 N	10.000 N

Requested parameter:		Running times		Pos. of switch		Running times		Pos. of switch	
Force	5000 N	2 s/mm	00	05	4 s/mm	00	05	05	05
stroke/s	6 s/mm	3 s/mm	01	06	6 s/mm	01	06	06	06
		6 s/mm	02	07	9 s/mm	02	07	07	07
		9 s/mm	03	08	12 s/mm	03	08	08	08
		12 s/mm	04	09	15 s/mm	04	09	09	09

Result:
switch position (S) 07

Function, adjustment and parameter

A) Self adjustment:

Push button T for min. 3 seconds. The actuator will drive into both end positions to be adjusted. LED indicates green blinking. The adjustment drive could be applied in any switch position (S).

B) Selection of running time and force:

Put 10 position switch (S) into the correct/selected position in acc. to above table. The selected parameter will work at next operation of the actuator. Adjustment can be done even without supply voltage. If supply voltage is available turn switch only if actuator is not running.

C) Additional information for 3-pos operation:

- a closed, b open = rod goes IN
- b closed, a open = rod goes OUT
- a and b closed = Motor doesn't work, No function
- a and b opened = Motor doesn't work, No function

D) Force in blocking position:

The force in the end position could be much more than the nominal force. Generally the valve is to check together with actuator and construed accordingly.

Junction Box

- Switch of the power
- Open cover junction box
- put cable through cable gland into junction box
- Strip wires approx. 7 mm
- Connect wires acc to wiring diagram and type
Note : wrong wiring expires warranty and guarantee
- Connect protection earth PE
- Fix wires, screw terminals
- Close cable entries tighten (IP66)
- Close cover junction box regard gasket

resp. feedback V/mA (3-6)
Supply (1-2) IN / OUT control (3-4)

Mounting instructions and important information for operation and installation
Manual Override

1. Actuator must be in stop position
2. Turn „red“ switch from motor to hand mode
3. Turn with allen key to needed stroke (top side)
CW = rod OUT
CCW = rod IN
4. After finish turn back to motor mode

When operating the manual override in case of failure it is possible that the gear decouples. It can be seen that the selector switch is turned on motor, the actuator when controlled does not execute any stroke movement. The blockade is resolved by simultaneously rotating the motor-hand switch and turning the Allen key in the hexagon shaft. The gear engages.

Safety notes

Supply 24...240 VAC/DC
Version ...Run-...-S limit switches 24 V/1 A, 240 V/0,25 A
Version ...Run-...-P potentiometer 0-1000 Ohm
Version ...Run-...-U feedback 0-10 V / 4-20 mA

- Do not open the cover when circuit alive
- The cable must be installed in a fixed position and protected against mechanical damage
- Connect potential earth.
- Avoid temperature transfer from valve to actuator (note max. ambient temperature !)
- Ambient temperature -20...+ 50°C
- Close all openings with min IP66
- Regard all regional standards, rules and regulations.
- For outdoor installation a protective housing against rain, snow and sun should be applied to the actuator, as well as a constant supply at terminal 1 and 2 for the integral heater.
- Use for wiring the integrated junction box
- Actuators are maintenance free

1. Demounting cover for stroke adjustment/limitation

Switch off power.

5 × open screw before remove cover.

Note cover gasket must be fit in the groove after remounting.

2. Adjust stroke

Stroke can be adjusted by thread nut from min 5 mm to 60 mm.

3. Open cover bracket feedback gear

If open cover bracket gear belt is removed from tensions after this choose the right setting acc. to stroke by hand – not use any tools. Due to repeatedly move of the red bar the setting of the gear belt gear can be changed. The position is corrected by closing the cover and starting a re-adjustment drive.

4. Gear belt adjustment for internal switches resp. potentiometer

If open cover bracket gear belt is removed from tension after this choose the right setting acc. to stroke by hand – not use any tools.

Internal switches acc. to gear belt setting adjust the switch points lower / higher limit.

setting	switch points at	
10 mm	0-1 mm	10-11 mm
20 mm	0-1 mm	19-20 mm
30 mm	0-1 mm	28-30 mm
60 mm	0-1 mm	55-60 mm

Note: there is no possibility to adjust interim values only with InSwitch-R (accessory).

Potentiometer
adjust the feedback signal (0-1000 Ohm) to stroke

5. Close cover bracket for feedback gear setting

Note right position of gear belt.

Close bracket thereby the gear belt is automatically tensioned.

6. Remounting cover

5 × fix screws tighten.

Note cover gasget must be fit in the groove after remounting.

Switch on power.
